

Airline Safety, compared to other modes of travelling

Accidents per airline

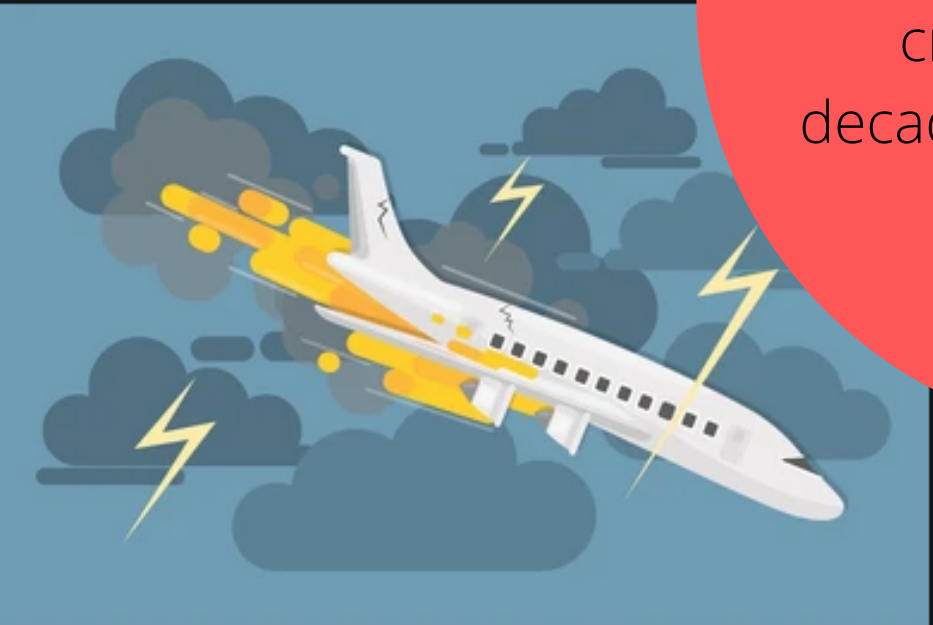

Malaysian airlines has the most number of air accidents in year 200-2014. Most of the crashes involve developing countries and not developed countries.

Air traffic and air fatalities trends

There is an evident increase in the air traffic which indicates that people are choosing air travel more than ever before. Even though there is a increase in air traffic, fatalities in air travel has reduced and a declining trend can be observed.

Number of fatalities in last decade

There were more than 500K deaths in road crashes in the last decade versus 3000 in air travel
